WD 01965—GPB—15,000—7-7-34

Notifies certain amendments-tv

General and Revenue Secretariat | Genl File No. 5-2 of 1937. | [App. F. III—2

Serial No. 1

From the chief inspector of mines and boilers
no 2093 dated 27/3/37.

Suggests that the testing of lightning conductors attached to Petroleum installations may with advantage be transferred to the department of mines and boilers from the Electrical department so that it may be done simultaneously with the periodical inspection of the installations & thus avoid unnecessary duplication of work & dual agency in this regard.

Subd.

1 The work of inspection and testing of the lightning conductors attached to Petroleum installations was transferred from the Genl dept. to the chief Electrical Engineer vide G.O. no D 4644-46/Genl 39-28-17 dated 13/7/29 and Govt notification no D 4647/Genl 39-28-18 dated 13/7/29.

2 The chief inspector states that the Mines & this department are testing the lightning conductors attached to boilers, magazines in the State & that they may, also with advantage, be entrusted with the testing work of the lightning conductors of the Petroleum installations. He therefore suggests that the work may be transferred

The administrative work of the Petroleum Regulations & Rules framed thereunder was recently transferred from the Genl dept to the chief inspector of mines & boilers in G.O. D 1289-337/Genl 18-33-2 dated 13/9/33 (Pg V)

Returned, with compliments, to the Secretary to Government, Electrical Department, Bangalore.

As the administration of the Petroleum Regulation ~~ax~~ and the rules thereunder has been transferred to the Chief Inspector of Mines, the periodical inspection and testing of the lightning conductors attached to the petroleum installations may be vested with the same Officer i.e. the Chief Inspector of Mines and the Rules 7 and 8 of Chapter I may be revised as recommended by him. This department undertook to do this work during the period the administration of Petroleum Regulation and the rules thereunder was under the control of the Director of Industries and Commerce, as the Officers of the above department were not conversant with the testing of the lightning conductors. But, as the Officers of the Chief Inspector of Mines are at present testing the lightning conductors attached to the Explosive Stores in the State, they are conversant with the work and hence the same may be passed on to them.

Both the Chief Electrical Engineer & the Secy, Electrical Deptt, are agreeable to the proposal. As the Rules under Section 23 (1) of the Mysore Petroleum Regulation the Rules to be amended have to be previously published in the Gazette for public opinion. If no objections & suggestions are received, the rules as amended may be finally notified in the Gazette. The amendment proposed by the Chief Inspector is merely the substitution of the "Chief Inspector of Mines and Boilers" for the

GOVERNMENT OF MYSORE.

Telegraphic Address:—
"MINESPECTOR"

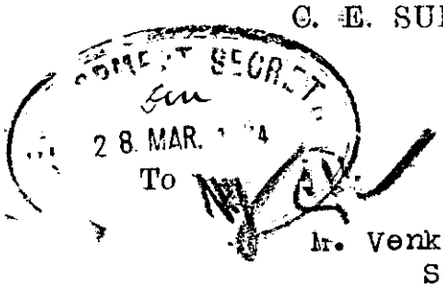
DEPARTMENT OF MINES AND EXPLOSIVES.
OFFICE OF THE CHIEF INSPECTOR OF MINES & Explosives IN MYSORE.

No. 2093.
Encl:—

Dated Oorgaum, 27th March 193 4
(S. India).

FROM

C. E. SURYANARAYANA RAU, ESQ., MEM. A.I.M.E., &C.,
Chief Inspector of Mines & Explosives in Mysore.



To

Mr. Venkatanaranappa, Esq., B.A.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Department,
Bangalore.

Sir,

I have the honour to state that under Rules 7 and 8, Chapter I of Part II, Mysore Petroleum Rules, as modified by Government in their Order No. D.144-46/Geol.39-28-17 dated 13th July 1929, the work of inspection and testing of the lightning conductors attached to Petroleum Installations is vested in the General Electrical Inspector of the Government Electrical Department. This arrangement of work was necessitated because the Department of Industries and Commerce which was administering the Petroleum Regulation and Rules thereunder could not carry on the testing of lightning conductors as the officers of that Department were not acquainted with the work. As the officers of this Department have been carrying on the testing of lightning conductors attached to Explosives Magazines in the State, I would suggest that the testing of lightning conductors attached to Petroleum Installations may with advantage be vested in this Department so that it may be done simultaneously with the periodical inspection of the Installations and thus avoid unnecessary duplication of work and duel agency in this regard.

Accordingly Rules 7 and 8 of Chapter I, above quoted will have

have to be amended as follows:-

Rule 7:-

"Not less than once in every year the connections "and contacts referred to in Rule 6 shall be "inspected and tested by an officer appointed in "that behalf in the manner prescribed by the "Chief Inspector of Mines and Explosives in Mysore "and any such officer shall be permitted to enter "the installation for the purpose of such test "at any time after sunrise and before sunset. A "certificate showing the date of the last test "shall be posted in a conspicuous place within the "installation."

Rule 8:-

"The fee payable for tests carried out under Rule "7 shall be Rs.10/- a year for each connection but "shall not exceed Rs.50/- for any number of connec- "tions relating to one receptacle. In case the "test discloses an unsatisfactory connection and the "need for rectification, the licensee shall never- "theless be liable to pay the prescribed fee and be "likewise liable to pay a fine at the same rate for "every subsequent test which may be necessary till "the connections are passed by the Chief Inspector of "Mines and Explosives in Mysore."

I request that Government may be pleased to approve of the amendments as proposed for the reasons stated above.

I have the honour to be,
Sir,
Your most obedient servant,

C E Somayanadhane

Chief Inspector of Mines
& Explosives in Mysore.
